Tousif Anwar

Philadelphia, PA | ta686@drexel.edu | 267-270-8787 | github.com/tousif-anwar

Skills

Languages	Python, Java, SQL, TypeScript, JavaScript, Bash/Shell, gRPC
Data Engineering	Spark/PySpark, Apache Iceberg, Airflow, AWS Glue, Snowflake, Databricks, ETL, Tableau
Cloud & DevOps	AWS (S3, Glue, EMR, Lambda, Athena, Redshift, EC2, IAM, CloudWatch), GCP (Firebase, ML), Azure (Cosmos DB), Cassandra, Docker, CI/CD
Frameworks & AI/ML	Spring Boot, Node.js, React, React Native, REST APIs, PyTorch, RAG, Claude Code, Codex

Experience

Software Engineer III – Backend (Python / PySpark) Dec 2025 – Oct 2026
JPMorgan Chase & Co. *Wilmington, DE*

- Eliminated 35% of recurring production incidents by diagnosing root-cause failure patterns and automating remediation workflows across 8 critical applications.
- Cut data processing time by 40% by engineering scalable ETL pipelines in Python and PySpark on AWS, directly powering 6 cross-functional analytics initiatives.
- Modernized 25 datasets (40 TB) onto AWS and Apache Iceberg, reducing transformation runtime by 30% through partition tuning and optimized extraction logic.
- Safeguarded 99.5% data accuracy and availability by architecting automated data quality gates that quarantine anomalies before reaching downstream consumers.
- Accelerated feature delivery by 20% using enterprise AI coding tools for refactoring, unit testing, and documentation, backed by peer review and automated security checks.

Software Engineer – Fullstack Jan 2023 – Nov 2025
Clear One Advantage *Remote*

- Reduced duplicate mobile effort by 40% by launching a unified iOS and Android app from a single React Native codebase with push notifications for 5,000+ users.
- Lowered app crash rate from 2.5% to 0.5% by instrumenting Sentry and Crashlytics telemetry, resolving production defects within 48 hours of detection.
- Shortened release cycles by 50% (14 to 7 days) by owning CI/CD build validation, versioning, and App Store/Google Play submissions while establishing mobile standards.
- Streamlined client–server data flow across 15 screens by co-designing REST API contracts with backend teams and implementing authentication, error handling, and serialization.

Fullstack Software Engineer Intern Aug 2023 – Dec 2023
Walmart Global Tech *Bentonville, AR*

- Cut time-to-detect production incidents by 30% by building smart-alert monitoring services in Java (Spring Boot) and React around critical system failure points.
- Shipped 3 production features reaching millions of users across React, Node.js, Spring Boot, Azure Cosmos DB, and Docker alongside architects and product managers.
- Enhanced platform reliability for end users by owning full-lifecycle software delivery from discovery through release.

Business Intelligence Analyst Jan 2021 – Aug 2023
Tripoint Lending *Remote*

- Reduced requirement-related rework by 25% by leading 20+ stakeholder sessions and translating business needs into user stories, wireframes, and QA test suites.
- Saved 15 engineering hours per release by authoring design documents, API guides, and SOPs across 6 concurrent projects in Jira, SharePoint, and Tableau.
- Accelerated delivery of 10 initiatives by scoping customer requests, managing backlog prioritization, and coordinating cross-functional development and validation.

Education

Drexel University | *M.S. in Computer Science* (GPA: 3.89 / 4.00) Philadelphia, PA | 2026
Western Governors University | *B.S. in Computer Science* (GPA: 4.00 / 4.00) Salt Lake City, UT | 2024
